100% OCS-certified organic ring-spun combed cotton (OCS, www.textileexchange.org)

By making the switch to organic cotton, you have a positive impact on the environment. You choose the eco-friendly option by protecting and conserving our water resources, replenishing and improving soil fertility, improving land quality and our planet in general.

The **Organic Content Standard (OCS)** relies on third-party verification to verify a final product contains the accurate amount of a given organically grown material.

We want to hand down a healthy environment to our children. By choosing organic products, whether it concerns food or clothing, we can make a significant contribution to that. From growers to retailers to consumers: the first step to make a difference requires a conscious decision. Responsible behaviour begins with growing our organic cotton. By abandoning toxic and persistent pesticides and fertilizers, we contribute to biological farming.

grey cotton thread
red elastane thread

The "full feeder" technology allows elastane to evenly spread over the entire surface of the fabric. To achieve this, in every woven row a very thin elastane thread (red) is processed together with a cotton thread (grey). This forms an especially soft and sleek fabric with a very high wearing comfort and a smooth surface that is excellent for printing.

COMFORTABLE MIDWEIGHT ACTIVE POWER FLEECE

The new Stedman® ACTIVE POWER FLEECE jackets are the midweight allrounder. They have improved heat-insulating properties due to their thicker material. These brand-new jackets offer a warm feel and modern look. Hoods can add an extra layer of protection to reduce the amount of heat that escapes from your ears and the top of your head.

STRETCHY FREEDOM OF MOVEMENT

ACTIVE 140 [MESH]

*Our Active 140 styles have a bird-eyelet mesh fabric, which makes them incredibly stretchy. The 100% **ACTIVE-DRY®** polyester has moisture control properties. Great temperature control, breathability and more freedom of movement are just some of the advantages of this material. The flat seams and soft feel contribute to maximum wearing comfort. Brilliant colours make them a great choice for textile printing.*

Pick your colour

We've added 28 new colours to our collection! Blended colours are a must this year. Our fabulous new organic cotton styles have their own little colour pallet.

★ New blended colours

★ New solid colours

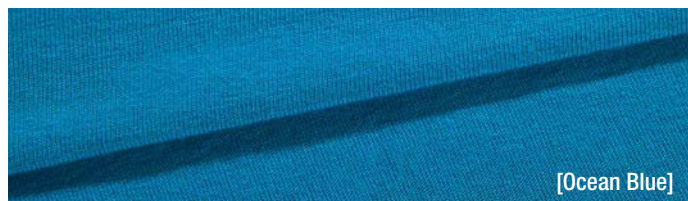

★ New organic colours

Stedman®

just for me

[Ocean Blue]

Single Jersey

Single Jersey is a single knit fabric (= a single set of needles is used for knitting) which has no distinct rib structure. Face and back side of the fabric look different. Most Stedman® garments are knitted from 100% ring-spun cotton either flat or tubular. Single Jersey fabric is mainly used for manufacturing T-shirts and due to its smooth surface it offers a perfect base for all kinds of textile decorations.

[King Blue]

★ Bird-Eyelet Mesh

Bird-eyelet mesh is a single jersey made from an extremely light and super stretchy polyester fabric for excellent freedom of movement. The bird-eyelet construction offers superior moisture and temperature control. It is extremely breathable and very soft to the touch. Brilliant colours, dirt repellence, wash-and-wear and quick drying properties make this fabric a smart choice for athletic wear.

[Bright Royal]

Piqué

Piqué fabrics are characterized by an all-over geometric structure like that of a waffle-weave. They can be produced in a variety of weights and fibres. Our Stedman® ring-spun cotton or polyester-cotton-blend polo shirts are made of a piqué fabric, which is very sturdy and offers a perfect base for textile embroideries.

[Purple Heather]

★ Blended Melange Cotton

Our blended melange cotton is knitted as a single jersey fabric combining two fibers. Cotton and polyester fibers are blended together in a fixed ratio (60:40). At least one yarn is dyed before spinning. This results in a heathered effect after spinning. The cotton-polyester blend is easier to clean than cotton and softer to the touch due to the smooth polyester fibers. Our new Stedman® Stars, LUKE and LISA, are joining the range in six stunning melange colour blends.

[Light Blue]

Rib

Rib is a one thread fabric and has a ribbed "knit-one-purl-one" structure. Rib fabrics are more elastic than Single Jersey and are therefore mainly used for women's body fitted styles like our Stedman® Comfort-T (ST2110) or Comfort-T Long Sleeve (ST2140).

[Horizon]

★ Melange Polyester

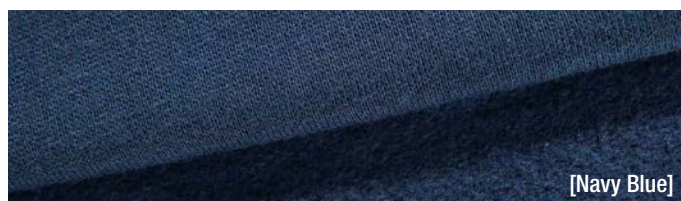

Melange polyester is made of different coloured polyester yarns. At least one yarn is dyed before a fine polyester fleece is knitted. After knitting the fabric gets brushed on the inside to create its soft feel leaving a smooth surface on the outside as a perfect base for textile printings. Our new Stedman® Active Performance Jackets with melange polyester are the stylish must-have for any exercising routine.

[True Blue]

★ Slub Cotton

Slub cotton is a single jersey fabric with a distinct structure. Using various carding, spinning, and twisting techniques, slub cotton yarn contains a high count of slubs as a textural and style alternative. It adds texture to the fabric while retaining an overall smooth surface. The slubs form a continuous pattern in the material with a very pleasing effect. Our new Stedman® Stars, SHAWN and SHARON, offer a modern base for all kinds of textile decorations.

[Navy Blue]

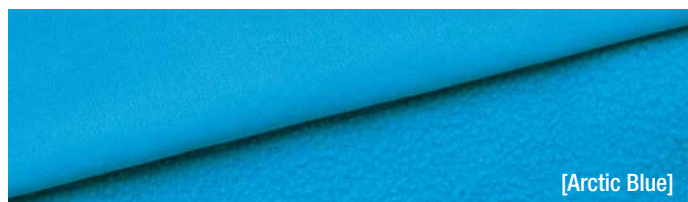

Sweatshirt

The fabric for Stedman® sweatshirts is made of a cotton-polyester-blend, which is thicker and more durable than normal T-shirt fabric. While knitting a feeding thread is used on the back side which is brushed in a refining process. Thus the fabric gets its fluffy inner surface with its warming and soft properties. Stedman® sweatshirts offer a perfect base for textile decoration like printing and embroidery.

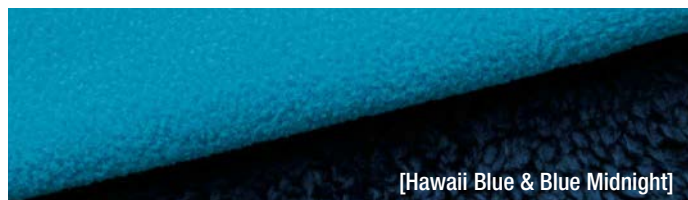

Interlock

Interlock fabric is a “double jersey” which is similar to a jersey knit. Face and back of the fabric look identical. The double knit construction makes this a thick and tight knit fabric, which is very elastic. The Stedman® Active Sports-T’s and Tops made of 100% polyester interlock fabric are very soft and durable and their smooth surface offers a perfect base for textile printings.

★ Bonded Fleece

Bonded fleece is made of two polyester fabrics combined via adhesive bonding. Bonding produces a thick fabric from 2 thinner fabrics by the use of adhesive and heat. Our new Bonded Fleece Hoody and Jackets have brushed fleece inside that is soft on your skin. The smooth and sleek surface on the outside is water repellent and due to the tight knit of the outer fabric, these styles can be used as a windbreaker after your workout. They also offer great heat insulation at a light weight.

★ Teddy Fleece

Our Teddy Fleece Jackets are the warmest jackets in the Stedman® collection. They are made of two polyester fabrics combined via adhesive bonding. The outer fabric is our heat-insulating micro fleece. On the inside you have the super soft and appealing teddy fleece. After knitting and brushing the loops are cut open with various thicknesses. This results in the popular furry look.

Micro Fleece

Micro fleece is mainly made of polyester yarn. After knitting the fabric gets brushed on either one or both sides to create its plush appearance. Due to its good heat-insulating properties and its incredibly light weight, micro fleece is primarily used for warming with comfort, as in our Stedman® Active Fleece collection.

More than just garments

Learn all about the high-quality fabrics we use in our Stedman® collection. Our fabrics are comfortable to wear and offer a perfect base for all kinds of textile decorations.

★ Knit Fleece

As the name implies, knit fleece has a knitted appearance. The surface is smooth and the premium knit look on the outside is visible due to thick polyester yarns. The fabric is brushed on the inside and therefore soft on the skin. Knit fleece styles are stretchy, water repellent and very durable. They offer great heat insulation at a light weight. Our Active Knit Fleece Jackets are a great choice for athletic wear with a sophisticated look.

★ Power Fleece

Power fleece is made of polyester yarn. After knitting the fabric gets brushed on both sides to create its plush appearance. It is considered the mid-weight of fleece fabrics providing better heat-insulating properties due to its thicker material. Our brand-new Power Fleece Jackets offer a warm feel and modern look.

★ Organic Cotton

Our organic cotton is a single jersey knitted from 100% ring-spun combed cotton which makes it extremely durable. It is 100% OCS-certified. The Organic Content Standard (OCS) relies on third-party verification to verify a final product contains the accurate amount of a given organically grown material. By abandoning toxic and persistent pesticides and fertilizers, we contribute to biological farming. Making the switch to our organic cotton styles (JAMES, JANET and little JAMIE) has a positive impact on the environment. These products are absolutely skin-friendly and offer a smooth surface: a perfect base for textile prints.

We care!

Be smart, be responsible and change the world by choosing the right business partners. We rely on suppliers and producers who comply with the high ethical standards of our company.

Our CSR team (for Corporate Social Responsibility) monitors the production facilities in order to assure high

standards in working conditions as well as environmental and social issues. We do NOT work with subcontractors when it comes to monitoring our quality. The CSR team screens our manufacturers with high diligence regarding work safety. Our garments and accessories comply with the regulations of OEKO-TEX® Standard 100. Furthermore we trade in accordance with the prescriptions of the Worldwide Responsible Accredited Production (WRAP). The regulations and prescriptions are considered extremely important and are strictly enforced by our company and our business partners.

OEKO-TEX® STANDARD 100

It is our responsibility to ensure that consumers are able to rely on our product safety. We monitor the quality of our supply chain assuring that the products we sell meet all government safety and quality standards on top of our own operating principles. Our garments and accessories comply with the regulations of OEKO-TEX® Standard 100. Hereby we can guarantee that all tested and certified textile products are free from pollutants that may be harmful to our health. The regulations are considered extremely important and therefore strictly enforced by Smartwares® Printables. www.oeko-tex.com

WRAP

WRAP is an independent, non-profit organisation dedicated to the certification of facilities engaged in lawful, humane and ethical production. Its principles include, among others, the prohibition of forced labor, child labor, harassment and abuse. It also focuses on working hours, health and safety and the environment. Naturally Smartwares® Printables operates in a highly ethical and socially responsible manner and continuously carries out inspections to ensure that WRAP's guidelines are being adhered to. www.wrapapparel.org

Find your perfect fit

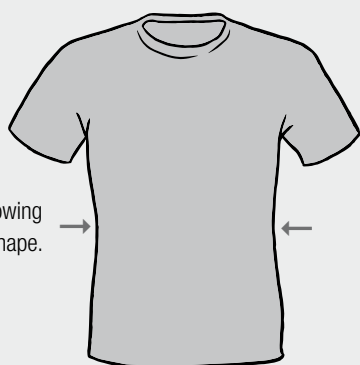

It doesn't matter if you are tall and slim or short and curvaceous. Our Stedman® collection offers perfect fits: Body Fit and Regular Fit are inspired by retail while satisfying the needs of modern promotional wear! You can find more Casual Fits in our Stedman® Basics collection.

BODY FIT

Slim cut but not too tight styles, inspired by retail complying the needs of modern promotion wear.

REGULAR FIT

Classic cut styles following the body shape.

CASUAL FIT

Generous and loose cut styles with comfortable wear.

Stedman® was established in 1953 in the US. Since 2001 Stedman® has been supplying high-quality clothing for your promotions at attractive prices all over Europe!

Subject to technical changes due to the fact that our products undergo continuous further developments. All weights stated in this catalogue apply to colour articles and are subject to standard variations. All styles are washable at 40°C, unless marked differently. For production reasons, the colours reproduced here may differ from those of the actual products.

The PEFC Council (Programme for the Endorsement of Forest Certification schemes) is an independent, non-profit, non-governmental organization, founded in 1999 which promotes sustainably managed forests through independent third party certification. The PEFC provides an assurance mechanism to purchasers of wood and paper products that they are promoting the sustainable management of forests.
